 Portfolio: fathima-creative-corner.vercel.app

CAREER OBJECTIVE

Aspiring AI & Full-Stack Developer with strong experience in web development, UI/UX design, artificial intelligence applications, and computer vision systems. Skilled in Python, JavaScript, Figma-based UI design, LLM integration, prompt engineering, and real-time AI systems. Passionate about building intelligent and user-friendly applications that solve real-world problems using modern AI technologies.

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript, SQL
Web Development:	HTML, CSS, Node.js, Express.js
AI / ML & APIs:	Computer Vision, YOLOv8, Deep Learning, LLM Integration, Prompt Engineering, REST APIs
UI/UX & Design:	Figma (Wireframing, Prototyping, UI Design Principles)
Tools & Platforms:	Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

AI Intern — *PlantDocBot (Infosys Springboard)*

Jan 2026 – Apr 2026

- Developed an end-to-end AI-based plant disease detection system accepting both chat and image inputs.
- Built complex AI workflows for production-ready image classification and disease prediction accuracy.
- Engineered prompt-based interaction systems to provide deep diagnostic information and plant care steps.

Web Design Intern — *Srishti Innovative Computer Systems Pvt. Ltd.*

Apr 2022 – May 2022

Technopark, Thiruvananthapuram

- Mastered modern frontend development workflows, design principles, and collaborative project life cycles.
- Observed and learned industry-standard software engineering and Agile deployment practices.

KEY PROJECTS

Driver Negligence Detection System (*AI + Computer Vision*)

Advanced AI System

- Engineered a real-time driver monitoring system modeled after Advanced Driver Assistance Systems (ADAS).
- Implemented **YOLOv8-based object detection** to trigger real-time inference for drowsiness, phone usage, and smoking.
- Handled core data operations including custom dataset preprocessing, augmentation, and robust model training.
- Built an integrated alert system complete with a live monitoring dashboard and automated violation tracking logic.

Lumi Chat — *AI Web Chat Application*

Full-Stack AI App

- Created an interactive AI chatbot featuring a highly engaging, custom animated avatar UI/UX layout.
- Developed the full responsive frontend using HTML, CSS, JavaScript, and a robust Node.js orchestration backend.
- Programmed micro-interactions and real-time canvas/CSS state animations (idle, blink, and deep emotional states).
- Connected dynamic REST endpoints using the Fetch API and optimized user session states via LocalStorage management.

Other Engineering Projects

Core Implementations

- **Expense Tracker Web App:** Built a comprehensive financial tracker managing income/expense ledgers with custom logic.
- **Weather App:** Designed a responsive weather interface leveraging asynchronous API data streaming.
- **Aesthetic To-Do App:** Engineered a minimalist, modern task management system featuring full CRUD operations.

EDUCATION

B.Tech in Computer Science Engineering

Musaliar College of Engineering and Technology

APJ Abdul Kalam Technological University, Kerala

Graduation Timeline: 2022 – 2026

CORE STRENGTHS

- End-to-end full-stack application development & systems scaling.
- Real-time computer vision deployment and performance optimization.
- Excellent UI/UX instinct combined with structural Figma workflows.
- Agile adaptive problem solver focused on high-efficiency execution.

CERTIFICATIONS & TRAINING

- ♦ **C-DAC:** Diploma in Multilingual Programming (A+)
- ♦ **IBM SkillsBuild:** AI Literacy & Prompt Engineering
- ♦ **Infosys Springboard:** Deep Learning & NLP Suite
- ♦ **AWS:** Solutions Architecture Simulation (Forage)
- ♦ **Deloitte:** Cybersecurity Engineering Simulation
- ♦ **ACM Kollam:** Machine Learning with Python
- ♦ **ICT Academy:** AI & Beyond Professional Track
